**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 27, 29, 30, 32 are rejected under 35 U.S.C. 102(e) as being anticipated by Shuman et al (US 6,161,071).

- In regard to claim 27, Shuman et al discloses a system for improving vehicular safety by enhancing collision avoidance, the system comprising:
  - A vehicle comprising onboard multiple sensors for monitoring parameters of the environment and the vehicle related to collision risk assessment
  - An onboard processor receiving inputs from the sensors, the processor analyzing the inputs using data fusion techniques to determine collision risk related information
  - Means for altering a drive of the vehicle when a collision risk exceeding a threshold risk level is determined
- In regard to claim 29, further comprising communicating the collision risk related information to a traffic center or other party. (Column 5, lines 7, lines 20-28)

- In regard to claim 30, Shuman et al discloses a system for enhancing vehicular safety and performance, the system comprising:
  - Multiple sensor for monitoring variables in a surrounding environment of the vehicle and for monitoring variables in vehicular mechanical and electrical systems
  - An onboard processor receiving inputs from the sensors, at least two different type of sensors providing inputs pertaining to each of the monitored variables, the processor using fusion techniques to determine a best value of monitored variables
  - Alerting a driver of the vehicle when a best value of a variable is outside a predetermined limit.
- In regard to claim 32, wherein the sensors include radar, infrared sensors, GPS detectors and vehicular inertial sensors (Column 8, lines 39-41, lines 49-50)

***Allowable Subject Matter***

2. The following is a statement of reasons for the indication of allowable subject matter: the prior art, individually or in combination, fails to disclose, teach or suggest in regard to claims 1, 20 and 33 the processing means comprising means for selecting a path for communicating information. The prior art only suggest sending the information directly to the destination and does not suggest selecting a path for the information.
3. Claims 2-19, 21-26, and 34-35 further define the invention.

***Conclusion***
